RHex the Parkour Robot

Gotta teach RHex to smear.

This looks like a
good idea.

...

This.

...

Update

It's porn. Cooking porn. Circa 1900. Poached pears! A whole turbot! Giant copper pots! Mise

COLLAPSE

Of course my first thoughts were '... things we are not allowed to do with the Mars Rovers...'. And I wonder how constrained a robot design becomes when you have to make it able to run 'upside down' as well as 'forwards and backwards'*.

This is how you know I am a nerd. When something is neat, I want to poke at it and ask questions that others don't know the answer to.

* This is a thing the Mars Rovers can do -- the wheels and navigation cameras are symmetrically placed.

Awww.... CUTE!

and I'm impressed, too.
